**Attachments:** Correspondence\_Preliminary Cuyahoga River Gorge Dam GLLA Project.pdf

Mary Beth and Chris – Attached is the correspondence (attached and text below) we received from Dominion Energy Ohio (DEO) regarding the abandoned gas line. The good news is the gas main were dealing with does not have a coating on it. We are following up the Steven Johns/DEO regarding the exact location and method for disconnecting the pipeline from their active pipelines and will include that information in our specifications.

Cheers!

Bill

**Subject:** [EXTERNAL] Gorge Dam GLAA Project - Dominion Correspondence

Good afternoon Laci,

First off, I'd like to apologize for the delay in my response. I have been out of the office the past 2 weeks and just returned yesterday.

Please see the attached correspondence regarding the Gorge Dam Project. Regarding the abandoned gas main, Dominion will not be responsible to remove the line prior to your construction. If our mainline had potentially harmful coatings, we would remove the main. However, this main in question is bare steel. Please plan to have your contractor remove the main as needed during your construction. If you have any questions regarding this, please feel free to reach out and I would be happy to assist you.

Thank You,

Steven Johns
